About This Game

WHAT IS WITHOUT ESCAPE?

Without Escape harkens back to first-person graphic adventures of the early '90s, which relied on pre-rendered backgrounds and full-motion video to tell interactive stories. Explore the confines of your own home as you flip between a mundane existence and a horrifying otherworld. Can you escape the nightmare and find the answers you're looking for?

STORY

One chilly winter night, you go home and notice that nobody's there. Your parents had told you that they would be visiting your grandparents for the weekend, so you give their absence no mind and go to bed.

I think companion uh.. slots are the wizard hat-shaped thing floating in your house. You can't attack with your fists or pick up the clearly 5-foot long blades that the enemies are seen with. I think your drawn mobs attack for you (they just bump into the enemy), and I haven't figured out much because the instructions are mobile-like in that there are no words and an icon shows you were to click without any explanation. The controls are Arrow keys, Z, X and the error sound is from Rpg Maker so that's probably what this was made in.

I recommend this game for its uniqueness and if you enjoyed Drawn to Life on Wii or DS. Except whereas you drew your character, weapons, and platforms in that game, here it's just the mobs that fight for you so far. The characters you draw have no animation and just slide around.. bring back the game!. Nice little game.. games abandoned. I dont ever write reviews for stuff. But dont buy this game.

Pub Encounter has an interesting story. Just personally, just not worked out as well as I hope it would be.

To me, the game seems too rushed (special few characters). The background-story and the effect that's it has on the men, need to be more on the foreground. I do dislike the fact the MC has no real backbone and sometimes no common sense.

Yes, I get MC is the loving and supporting MC, but it's depressing to read; every time something goes wrong on her job, she goes to the bar. Not trying to really work on herself or maybe try something else to be better.

The game is clear not for young (or immature) audience. 16+ at least in belief. There will be some darker themes in the story. As life was not kind to your men. But again, for me personally, need more work on that part and effect of it on the characters.

To me the game was simply not interesting, more boring if I'm honest. The bland MC and characters just didn't make it interesting enough. Really, Ryunoske route, was painful for me to finish, MC and Ryu were too bland. I really was thinking a lot of the time; 'what does she/he see in the other?'; because really what is there to love with such a shallow connection/relationship? I do say that Mamoru makes it a lot better with his story.

At least the art is good. Clear and nice enough to look at. The music was plus. Really like that music sound.

If you want to buy the game, do it at least when it's on sale.. Wait for a decent sale. 10 hours tops of game time waiting for you.

There are a few gripes: cancelling commands is wonky, slow paced for normal speed and trying to speed up the game in the later parts with the number of units you can make is laggy. Not a bad game but not at 15 bucks.. Well that got out of hand quickly.

Seems like it would be best if you only experienced this first hand. This is hands down a game that is short and sweet. Know that your money is in good hands because this was not made hand over fist.

I'll be on my way out to wash my hands from these handy puns.. Very game is good to play :D Rate it from 0/10 its a 10/10 solid.

I like to eat. Recommend it for 2 year old fetuses :D. If you're looking for a game where you pilot/fire cannons, rockets, and flamethrowers at your enemies from primitive blimps with your friends than this is the game for you. Sadly there aren't very many people playing these days so AirBuccaneers only gets played when I have friends online playing it.

7/10. this is the most best car game EVER CREATED

. I'd recommend this game if you're into RPG Maker horror games, but it's quite rough around the edges in a lot of ways, especially gameplay-wise.

The story is pretty good for the most part, namely the concept, and I'm a fan of the music, atmosphere, and puzzles. Not too much to complain about here, aside from some corny parts of the story, and one or two questionable puzzle solutions, but for the most part I had a good time with it. Big fan of the atmosphere, and the whole doll idea.

Gameplay-wise, my biggest complaint are the randomly roaming dolls that can kill you in seconds if you get cornered, which is difficult to avoid at times due to their unpredictable and sudden movements. Another one was blood stains that are difficult to see, but it's not a huge issue. There are some other specific points with poor gameplay design, the biggest one to me being the big bear chasing you towards the end, how out of the blue it starts going faster part way through the chase, and you basically have to use speed pills. Maybe I needed runners on, but it didn't occur to me that I'd need them, and it didn't give any signal beforehand that I'd noticed that I'd need to put on the runners.

Another complaint was the way it deals with resolution, I had to set my monitor to 1024x768 resolution in order for it to look good in full screen (because you don't play horror games windowed if you care about the atmosphere at all). Was overall a bit wonky and it took me a bit to figure out what to do, but after figuring out the resolution thing I had no complaints. Though I imagine people with at least 1080p monitors might complain more about this issue.

If you can get past some rough parts gameplay-wise, it's certainly worth giving a shot, especially at its decent enough price. For me, the overall feel of it was worth playing, I'm a sucker for dark horror atmospheres.. Pretty good game and has much easier game mechanics than other Dog Fight games, could have been better if the developers tried improving. If the servers work fine the game is definitely worth a try.. For an early access game it's pretty good. the only problem is the gameplay, it should be more exciting than traveling to places. On the other hand you can attack enemy ships and stuff but you have to travel to a location to take on the mission and then travel again to get to the enemy. You can build multiple ships which is cool and toggle between them. there's a few bugs, like my engineers dying from lack of living space when I have 4 living towers, but not many major game breaking bugs. Since they are updating it I feel like it was worth my 15\$ now and will be worth it later. All I have to say is DO IT..... FOR THE BURGERS.
